Sales: Phone 724-325-5600 – Fax 724-325-5611

Parts/Service: Phone 724-325-5605 – Fax 724-325-5612

E-Mail: sales@kastoinc.com

KASTO *unicomact* systems are custom-designed to store large amounts of bar or extrusion products. They are primarily found in metal distribution and in industries related to window and door manufacturers.

The “typical” system has 1,500 – 4,000 storage locations with cassette sizes ranging from:

Width 12 - 24 inches
Height 10 - 24 inches
Length 12 - 26 feet

Weight carrying capacity
from 2,200 lbs – 15,000 lbs per cassette.

A *unicomact* is normally used where – aside from large storage quantities – fast access times are essential. With approximately 40 – 50 picks per hour, 24 hours a day, a system needs the right number of order filling stations combined with the proper handling

equipment, such as sway-free cranes and magnets (where applicable). Together with conveyor tables, weighing scales and computer terminal, the right equipment assures much faster, safer and easier handling than conventional storage solutions.
