

Still Think You Can't Afford Automation?

In March 2004, KLEIN STEEL SERVICE in Rochester, NY, installed a fully automatic, high-rise KASTO*unicompact 5.0* Storage and Retrieval System for their bar stock. Originally with 843 cassettes, it now has 2,112 cassettes with a max. load capacity of 24 million pounds.

Here are a few numbers, accumulated over almost 6 years:

25% reduction in manpower to fill orders

42% faster order filling

300% more business

154 million pounds steel removed/added

81,000 SKU's in the AS/RS (stock length + drops)

1.7 million requests from 40+ users

**After 4 years of continuous operation, Klein Steel did a physical inventory :
the total inventory adjustment was \$ +1,930.95!**

PROOF IS IN THE NUMBERS.
